Companies routinely claim that 'Our People Are Our Greatest Asset', but research data shows that in practice most people do not actually use their assets much at work. This books aims to change that. When employees learn how to truly apply their greatest strengths at work, they turbo-charge their career potential and everybody wins. Companies find that their employees are more productive, their teams are more effective, their organization is more innovative and, accordingly, their customers are more engaged. In **FIRST, BREAK ALL THE RULES**, Marcus Buckingham proved the

examples to reveal that at the heart of each insight lies a controlling insight. Lose sight of this 'one thing' and all of your best efforts at managing, leading, or individual achievement will be diminished. For great managing, the controlling insight has less to do with fairness, or team building, or clear expectations (although all are important). Rather, the one thing great managers know is the need to discover and then capitalize on what is unique about each person. For leadership, the controlling insight is the opposite - discover and capitalize on what is universal to all your people, regardless of differences in personality, race, sex, or age. For sustained individual success, the controlling insight is the need to discover what you don't like doing, and know how and when to stop doing it. In every way a groundbreaking work, **THE ONE THING YOU NEED TO KNOW** offers crucial
